PROFESSIONAL SUMMARY

Aspiring technology professional skilled in Full-Stack Development, Data Analysis, and Frontend Engineering. Proficient in MERN stack, SQL, Python, and UI frameworks, passionate about building scalable applications, deriving insights from data, and delivering user-focused solutions.

EDUCATION

Jain Institute of Technology , Davanagere <i>Information Science and Engineering – 7.7CGPA</i>	May 2026
J M J PU College , Sirsi <i>PCMB – 82.16%</i>	May 2022
Morarji Desai Residential School , Begur Shikaripur <i>Percentile – 75.84%</i>	June 2020

SKILLS

- **Technical Skills:**
Core Programming Skills: Java, Python
Frontend: HTML, CSS
Databases: MySQL
- **Soft Skill:**
Team collaboration & communication, Time Management, Active Listener.
- **Core Subjects:**
Web Development, DBMS, Software Engineering.
- **Tools:**
Power BI, Tableau, VS Code, Jupiter Notebook

PROJECTS

- **Maintenance Ticket Issue Tracker** December 2024
A Maintenance Ticket Issue Tracker is a software tool that logs, tracks and manages service or maintenance issues to ensure the timely resolution across various domains.
Technologies Used: HTML, CSS, JavaScript, PHP, SQL, Node.js
- **Calories Burst Prediction Using Machine Learning** April 2025
Built a machine learning system to estimate calories burned using workout and physiological data. Tested multiple algorithms, with XGBoost giving the most accurate results.
Created a personalized prediction model to support effective fitness tracking.
- **Gym Website with Email Functionality** June 2025
Developed a MERN stack gym website with membership management, workout scheduling, and integrated email contact feature. Designed secure backend APIs using Express and Nodemailer for seamless user communication.

EXPERIENCE

- | | |
|--|-----------|
| Cyber Security Intern – ShadowFox | June 2025 |
|--|-----------|
- Completed a Cyber Security Internship at ShadowFox with hands-on training in basic penetration testing. Scanned for open ports using Nmap and discovered directory exposures using Dirsearch.
 - Intercepted unencrypted login credentials using Wireshark to demonstrate real-world HTTP vulnerabilities. Gained practical experience in vulnerability analysis and secure web application practices.

CERTIFICATIONS

- C programming (Infosys Springboard)
- Python programming, Complete JS Bootcamp, HTML and CSS (Udemy)
- Excel (United Latino Student Association)
- Data Analyst (One Roadmap)

Languages

- Kannada
- English
